

CARE TIPS

Coop Wood Care: To protect wood and increase durability, wood can be coated with a non-toxic outdoor paint or water based sealant. For best results, re-coat yearly, especially in climates with extreme weather conditions.

Cleaning Instruction: Clean with water and mild soap. Avoid harsh detergents. Dry completely.

Coop Anchoring: Coops, like all small outdoor sheds or structures, can be moved by heavy winds and storms. To provide additional stability to your coop, use techniques recommended for outdoor sheds.

Additional Tips to Increase Predator Resistance:

- If allowing chickens to free-range during the day, always make sure they are secured in the coop at night.
- Install hardware cloth around the bottom of coop to protect against digging predators.
- Use food concealing feeders to protect against rats and mice.

WARNING:

Do not climb on the unit.
Children should not be allowed in, on or around the unit without proper supervision.
If any structural component is discovered to be broken or missing, stop the use of the product immediately.
Check hardware periodically to ensure screw/bolt tightness and security.
Keep coop in safe area away from high winds and extreme temperatures.
Never use heating lamps for risk of fire.
